

**IN THE CLAIMS:**

Please cancel claims 1-11 without prejudice to or disclaimer of the subject matter recited therein.

Please add new claims 12-22 as follows:

**LISTING OF CURRENT CLAIMS**

Claims 1-11. (Canceled)

Claim 12. (New) A cable connector comprising:

- a) a housing;
- b) a plurality of transmitting terminals and grounding terminals inserted inside said housing;
- 5 c) a cable having a plurality of transmitting units and grounding lines, each of the plurality of transmitting units having one of the plurality of grounding lines located on each of two opposing sides thereof; and
- d) a connecting part engaging said plurality of grounding terminals with said plurality of grounding lines forming an electrical contact.

Claim 13. (New) The cable connector according to claim 12, wherein said connecting part is a sheath with an electrical contact material.

Claim 14. (New) The cable connector according to claim 12, wherein the connecting part includes a protrusion portion located at a predetermined position.

Claim 15. (New) The cable connector according to claim 14, wherein said protrusion portion is formed by a pressing process.

Claim 16. (New) The cable connector according to claim 12, wherein said plurality of grounding lines are bent and connected to said connecting part.

Claim 17. (New) A cable connector comprising:

- a) a housing;
- b) a plurality of transmitting terminals inserted inside said housing;
- c) a cable having a plurality of transmitting units and grounding lines,  
each of the plurality of transmitting units having one of the plurality of  
grounding lines located on each of two opposing sides thereof; and
- d) a connecting part forced and coupled to said plurality of grounding  
lines forming an electrical contact, wherein a first end of said  
connecting part is extended directly and has a plurality of grounding  
terminals inserted into said housing.

Claim 18. (New) The cable connector according to claim 17, wherein said connecting part is made of an electrical contact material.

Claim 19. (New) The cable connector according to claim 17, wherein the connecting part includes a protrusion portion installed in a second end.

Claim 20. (New) The cable connector according to claim 19, wherein the connecting part includes a wing portion extending from each of two ends of the protrusion portion.

Claim 21. (New) The cable connector according to claim 19, wherein said protrusion portion is formed by a pressing process.

Claim 22. (New) The cable connector according to claim 19, wherein said plurality of grounding lines are bent and connected to said connecting part.
